PROFESSIONAL SUMMARY

Java Developer and IT student specialized in **Springboot, and GenAI**, with strong **CS fundamentals and 200+ DSA problems** solved. Experienced in building **scalable applications**, seeking to apply core CS principles and full-stack skills in software engineering roles.

TECHNICAL SKILLS

Languages: Java, JavaScript, Python, SQL, HTML, CSS

CS Fundamentals: Data Structure & Algorithm, OOP, DBMS, Operating Systems, Computer Networks

Software Development: React.js, REST APIs, Spring Boot, Spring Security

Tools: Git, GitHub, Docker

AI: Generative AI, LangChain, Vector Databases

PROJECTS

UPI Mesh Network Simulator | Java, Springboot, MySQL, React.js

[Github](#)

- Developed an offline payment system that allows transactions to be relayed through nearby devices over Bluetooth when internet connectivity is unavailable.
- Implemented mesh-network routing using relay nodes, packet forwarding, TTL control, and packet deduplication to ensure reliable transaction delivery.
- Built secure transaction processing APIs, device management modules, and real-time transaction tracking using Spring Boot and MySQL.
- Designed a dashboard to monitor connected devices, transaction status, relay paths, and system logs for mesh-network simulation.

AI Powered Interview Preparation Platform | Springboot, React.js, MySQL, JWT, OpenAI API

[Github](#)

- Developed a full-stack platform for AI-driven mock interviews, resume analysis, and job matching to help users improve interview performance.
- Integrated OpenAI API to generate interview questions, evaluate user responses, and provide personalized feedback and recommendations.
- Built RESTful APIs using Spring Boot, Spring Data JPA, and MySQL following a layered architecture (Controller Service-Repository).
- Designed features such as resume parsing, interview analytics, and performance tracking to deliver actionable insights to users.

EXPERIENCE

Web Developer Intern — (ACS Technology)

Jan 2026 – Feb 2026

Snaply – Full Stack Social Media Platform (MERN Stack)

[Github](#)

- Developed a full-stack social media platform enabling users to create posts, share images, like, comment, and interact with other users and real time communication.
- Implemented secure user authentication and authorization using JWT, along with profile management and personalized content feeds.

ACHIEVEMENTS

- Solved **150+ DSA problems on Leetcode**.
- Completed **80+ hours**, training in Generative AI.

EDUCATION

MET BKC Institute of Engineering, Nashik

Aug 2023 – Present

Bachelor of Engineering in Information Technology

SGPA: 8.84
